Pool Water Control

Pool Test Kit Phosphate

Does your pool have an algae problem? Algae growth is often a result of phosphate in the pool water. In order to combat the issue, a phosphate binding material can be added to the water, combined with a routine practice of monitoring phosphate levels in the pool. It is important that the solution you choose can accurately detect the low concentration of

200 $\mu\text{g/l PO}_4$, the level at which an algae bloom can occur.

The Lovibond® Pool Test Kit Phosphate is up to the task!
